

Mahmoud Elshahatt *Android Developer*

mahmoudelshahatt1@gmail.com | +20 109 372 9626 | Cairo - Egypt | LinkedIn | Github | Portfolio

SUMMARY

Android Developer with a strong foundation in Kotlin and modern Android development. Passionate about software engineering and continuous learning, with a focus on building scalable, maintainable, and user-centric mobile applications. Eager to adopt new technologies and concepts to enhance development processes and deliver exceptional user experiences

EXPERIENCE

Android Developer

Awamer Alshabaka (AAIT)

03/2024 – Present
Egypt – El Mansoura

- Engineered and shipped native Android applications for diverse businesses (E-commerce, services and ride hailing), supporting thousands of daily users and achieving consistently positive app ratings.
- Implemented real-time communication using Socket.IO and ZegoCloud across multiple production apps, Enhancing messaging, live tracking, and audio/video reliability for thousands of active users.
- Integrated multiple payment gateways (MyFatoorah / Moyaser / HyperPay), achieving high transaction success rates (95%+).
- Applied modern architectural patterns (MVVM / MVI), Clean Architecture and modularization (by feature and by layer) across projects, accelerating feature development by 20–40% and significantly enhancing long-term maintainability and scalability.

Android Developer

Alexon Incorp. for E-solutions

03/2023 – 03/2024
Egypt – El Mansoura

- Developed and shipped native Android e-commerce and restaurant apps, delivering seamless shopping and intuitive ordering experiences.
- Implemented live order tracking and in-app chat , improving engagement/retention significantly, reducing customer inquiries by up to 25%, and contributing to better overall app performance.

SKILLS & TOOLS

Programming Languages

Kotlin - Java - C++ - C#

Android Development Stack

Android SDK - Jetpack Compose - XML - Paging 3 - Navigation Component - ExoPlayer3 - Dagger/Hilt - Google Maps - Firebase - CI/CD - Material Design

Threading

Coroutines - Flow - LiveData - RxJava

Networking

REST Apis using Retrofit - OkHttp - SSL/ TLS Pinning

Real-time & Communication

Socket.IO - Zego Cloud

Build System

Build Variants (Flavors) - Gradle (Version Catalog, KTS) - Proguard - R8

Tools & Workflow

Claude Code - Git/GitHub - Jira - Trello

Software Design

OOP - Clean Code - SOLID - Design Patterns

Android Architecture

MVC - MVP - MVVM - MVI
Clean Architecture (multi-module, layered, and feature-based)

Local Data

Room - Data Store

Testing

JUnit - MockK - UI tests for Jetpack Compose

FinTech

Knowledge of ISO 8583, ISO 7816 APDU and AES / RSA Encryption

Core Programming & Fundamentals

Strong OOP - Data Structures & Algorithms - Problem Solving - SQL

Methodologies

Agile - Scrum

PROJECTS

Mehany Express

On-Demand Maintenance App

Contributed to the development of an on-demand home services platform connecting customers with skilled technicians for plumbing, electrical, and AC maintenance. Implemented client-driven requirements, introduced new features, and optimized existing functionality to improve user experience, service reliability, and overall platform performance for users.

Google Play Link: **User** [↗](#)

Easy Wash KSA

Multi-App On-Demand Laundry Platform (User - Delegate - Provider)

Engineered and shipped a multi-app laundry ecosystem for customers, delegates, and providers, streamlining laundry service booking, pickup/delivery operations, secure payments, and order tracking. Delivered scalable features that improved operational efficiency and user experience across the platform.

Google Play Links: **User** [↗](#) - **Delegate** [↗](#) - **Provider** [↗](#)

Carhub

On-Demand Car Wash Booking Platform (User - Provider)

Built Carhub that is a car wash marketplace that connects customers with service providers, enabling convenient booking, provider selection, scheduling, and service tracking through a seamless mobile experience.

Google Play Links: **User** [↗](#) - **Provider** [↗](#)

TAM

Spare Parts Marketplace (User - Provider)

Created a spare parts marketplace that connects customers with suppliers, enabling efficient product discovery, comparison, and ordering through a seamless and user-friendly experience. Enhanced core features and workflows to improve accessibility and streamline the purchasing process.

Google Play Links : **User** [↗](#) - **Provider** [↗](#)

Muakad

Telemedicine & Medical Consultation Platform

Built the doctor app for a medical consultation platform that connects patients with doctors, enabling instant and scheduled appointments for fast, convenient, and accessible healthcare.

Google Play Link : **Provider** [↗](#)

Yalla Ghaseel [↗](#)

Eco-Friendly Solar-Powered Car Wash Service Platform

Developed Yalla Ghaseel that is a mobile car wash platform that delivers convenient, on-demand car care services across the UAE. Enhanced core features to support service booking, operational efficiency, and a seamless customer experience.

EDUCATION

Faculty of Engineering (Computer Science and Control Systems)

2019 – 2024

Mansoura University

Graduation Project “S3Y” grade is Excellent.

Android Application Development Certification | FWD

10/2022 – 12/2022

Udacity / Ministry of Communications and Information Technology (MCIT)

Certificate [↗](#)

LANGUAGES

Arabic

Native

English

Proficient
