SUMMARY

I'm an experienced software engineer specializing in native mobile development with Android. I'm looking for a role where I can grow, contribute to impactful mobile products that millions of users rely on — and work with a team that values clean architecture and good engineering practices.

EXPERIENCE

- Android Developer

Awamer Alshabaka (AAIT) - (2 years 2 months)

- Engineered and shipped mobile apps powering diverse businesses — supporting thousands of daily users and achieving positive app ratings.
 - Integrated multiple payment gateways (MyFatoorah / Moyaser / HyperPay) — achieving high transaction success rates (95%+).
 - Applied modern architectural patterns including MVVM and MVI across projects — making feature additions faster and more reliable for long-term scalability.
 - Applied Clean Architecture and modularization (by feature and by layer) across projects — accelerating feature development by 20-40% and significantly enhancing long-term maintainability and scalability.

Mar 2024 - Present
Egypt – El Mansoura
- Android Developer

Alexon Incorp. for E-solutions - (1 years)

- Developed and shipped full-featured e-commerce and restaurant mobile apps using native Android — delivering seamless shopping experiences, intuitive ordering flows.
 - Engineered live order tracking and in-app chat — improving engagement/retention significantly, reducing customer inquiries by up to 25%, and contributing to better overall app performance.

Mar 2023 - Mar 2024
Egypt – El Mansoura
- Internship

The Sparks Foundation

- Developed proficiency in the modern Android ecosystem — gained knowledge in Kotlin, Jetpack libraries.
 - Continuously learned emerging skills and delivered on commitments — upskilled in advanced topics while completing all sprint tasks on time in 100% of cycles

Feb 2022 - May 2022

EDUCATION

Faculty of Engineering

(Computer Science and Control Systems) - Mansoura University.

Graduation Project “S3Y” grade is Excellent.

2019- 2024

SKILLS & Tools

Programming Languages : Kotlin - Java - C++ - C#.

Architecture Pattern : MVP - MVVM - MVI - Clean Architecture - SOLID Principles.

Android Development Stack : Android SDK - Jetpack Compose - Paging 3 - ExoPlayer3 -Room - Retrofit - Dagger/Hilt - Coroutines/Flows - CI/CD - DataStore - FCM & Firebase - RxJava basics - Material Design.

Testing : Familiarity with UI Test - Unit Test - Integration Test.

Core Programming & Fundamentals : Strong OOP - Data Structures & Algorithms - Problem Solving - SQL

Methodologies: Familiarity with Agile and Scrum.

Tools & Workflow : Claude Code - Git/GitHub - Jira - Trello.

Projects

- Mehany Express

Mehany Express offers on-demand maintenance services for plumbing, electricity, and AC with easy booking, transparent pricing, and access to trusted technicians.
- Easy Wash KSA

Easy Wash KSA is an on-demand laundry app offering flexible services, pickup/delivery, secure payments, and 24/7 support, with expanding service coverage.

- **TAM**
The app connects users with spare parts suppliers on one reliable platform, saving time and effort.
- **Muakad**
Moakad is a medical consultation app that connects users with doctors, offering instant and scheduled appointments for fast, convenient, and accessible healthcare.
- **Carhub**
Carhub lets you easily book car wash services, choose providers, and schedule at your convenience with ratings for informed decisions.
- **Carhub - Supervisor**
Car Hub Provider is an app that enables car wash service providers to manage bookings, track orders, and deliver services efficiently to customers.

Volunteer Activity

- | | |
|---|---------------------|
| ● Head of Android Committee at “GOC” Team, Mansoura University | Nov 2022 - Jul 2023 |
| ● Head of Android Circle at “CAT Reloaded” Team, Mansoura University <ul style="list-style-type: none">○ Assigning and reviewing tasks to members.○ Interviewing members who want to join the circle. | Sep 2022 – Sep 2023 |
| ● Android circle Supervisor at “CAT Reloaded” Team, Mansoura University. | Mar 2022 - Sep 2022 |
